The VueTRAC banner special fabric graphic and backing is designed to keep your scrolling banner on track*. Specifically designed for the unique demands of any motor driven scrolling banner system. VueTRAC has been lab tested to minimize any unwanted wandering common on most rotating systems. A wandering graphic can be damaged the first time it moves off track. VueTrac combines the right fabric materials and imaging processes to produce a graphic image that not only looks great but maintains its quality over time. Common scrolling vinyl or laminated banner graphics ding, scratch and crease while being stored or shipped, VueTRAC fabric graphics are far superior not only in image quality but in overall durability. If a VueTRAC fabric banner is creased, from improper storage or shipping, it will easily refresh with a quick burst of steam. VueTRAC fabric graphics will not scratch or ding providing years of service. Protect your investment, ask for VueTRAC graphics to be used on your next scrolling banner graphic.

Graphic Options

VueTRAC

* Tested on ReVue scrolling banner systems. Any graphic in motion should always be under supervision. Incorrect set-up of unit may produce inconsistent results and damage to graphic.
